

List of service installations

Timetable 2024

Last updated: 1 January 2024

DB InfraGO AG

Headquarters

Index

1. Introduction

2. Legend of additional facilities

3. Service installations

1. Introduction

The following overview contains the tracks in the service installations offered by the DB InfraGO AG. To the use of these tracks it can be necessary in individual cases to use other feeding switches or tracks. For reasons of clarity these are not a component of the following composition. For more information contact the Customer Management at the DB InfraGO AG Regional Units.

The kind of the binding shows the current binding from an account-technical view. There may be changes due to adaptations of the operational processes. As an infrastructure operator, DB InfraGO AG is permanently concerned with the maintenance and optimization of quality and circumference of her service facilities. Hence, the usage of service facilities may be limited for constructional reasons.

Service facilities, which are characterized as “construction” or “emergency management” are capacities required by DB InfraGO AG for its own needs.

Important information:

To use the new "smart shore power supply" (ELS), you need a company-specific access option. In addition, the electricity supply contract is still mandatory. For this purpose, please contact DB Energie GmbH at the e-mail address elektranten.dbenergie@deutschebahn.com.

2. Legend of additional facilities

Abbreviation	Description
BPG	stationary brake testing
DKLS	system compressed air unit
DKLSS	compressed air unit, 230 V
ELEK	shore power supply
ELS	smart shore power supply
INRA	interior cleaning facility
WVS/WVD	weighbridge
WAFS	water filling facility
WCEA	toilet effluent disposal unit
ESTH	ancilla
DRSH	turntable
MEDI	media locker
OLI	oil transfer facility
ZVHA1	electric train preheating system 50 Hz
ZVHA2	electric train preheating system 16 2/3 Hz
BESA	sand filling system
BUEH	work and cleaning stage
TAM	containment sump / cushion system
TAW	containment sump
